Section IV. Well Construction Schematic:

You will need to work with a licensed well drilling contractor in order to submit a proposed well design schematic. The driller can work closely with the District and should provide a well design schematic with specifications to include: the total depth, borehole diameter, casing diameter and depth, annular seal interval(s), annular sealing method, calculated grout volumes,

grout material, surface completion specifications, pump setting, pump size and horse power, and any other pertinent well construction information.

Section V. Declarations Initial to indicate that the applicant has read and understands the following declarations. _The applicant agrees that water produced/withdrawn from the well in reference will be put to beneficial use at all times. The applicant agrees that water produced/withdrawn from the well in reference would not cause waste and the applicant agrees to avoid waste and achieve water conservation. The applicant understands that failure to submit all required application items within the application review period will result in an administratively incomplete application and non-issuance of a permit. The applicant will comply with the District Rules and Bylaws, all orders, and permits promulgated pursuant to the District Rules. The applicant will comply with well plugging and capping guidelines set forth in these Rules and will report well closures as required in Rule 3-5. Many of the incorporated cities within Travis and Hays County have ordinances concerning the drilling of wells within their city limits. It is your responsibility to comply with your city ordinances regarding the drilling of wells. The permits issued by the Barton Springs Edwards Aquifer Conservation District do not confer any right to violate any city ordinances regarding drilling wells within city limits. The applicant understands that this permit confers no vested rights in the holder and the permit is non-transferable. Written notice must be given to the District by the permittee prior to any sale or lease of the well covers by the permit. This permit and the authorized volume are applicable only to a well with a Limited Production Permit. If the use type changes, this permit is no longer authorized under this general permit. Section VI. User Conservation Plan (UCP) District staff will provide you a template for a User Conservation Plan (UCP). The UCP will need to be completed, signed, and submitted to the District prior to drilling the well. Section VII. Applicant or Authorized Agent Sworn Statement I hereby make application to the Barton Springs/Edwards Aquifer Conservation District for the purpose indicated above for the water well described herein, and I certify that I am the property owner/grantor or lessee/grantee or an Authorized Agent, and that each and all the statements herein are true and correct, and that I will comply with District Rules, Well Construction Standards, and groundwater use permit and plan requirements. I hereby authorize the District access to this property following reasonable advance notice or, in an emergency, immediately, with such emergency access reported to the owner if advance notice was not possible. The District may access the well for the purposes of inspecting, collecting water quality samples, and investigating conditions relating to the withdrawal, waste, water quality, pollution or contamination of groundwater.
